Cyber Summit Budapest 2025

Proaktív Security AI Támogatással

Barna Tamás CISSP, CCSP, Security +
Senior System Engineer , Trend Micro

**AI is reshaping the
threat landscape.
Being reactive isn't enough.**

Complex defense is **expensive**

Disjointed teams

Too many tools

Delayed response

AI risks

Alert overload

Data exposure risks

Attackers thrive on complexity

What's the easiest way in?

How can I move in the network?

And **compromise** the most valuable assets

Critical Assets

Proactive security starts here

Visibility • Prioritization • Mitigation

VISIBILITY

Eliminate security
blind spots

Visibility

USING

Native Telemetry

Endpoints

Network

Cloud

Email

Third-Party Sources

aws

tenable

TO

Continuously discover known
and unknown assets

Centralize asset inventory and
management

Assess risk across your
digital estate

Map IT infrastructure gaps

and unknown assets

Centralize asset inventory and
management

Assess risk across your
digital estate

Map IT infrastructure gaps

PRIORITIZATION

Focus on what
matters most

Prioritization

USING

Trend Cybertron powered by:

3000+ security experts

1000+ patents,
documentation, and logs

20+ year industry leading
bug bounty program

TO

Identify which issues
need attention

Focus resources on
critical risks

Rank issues based on
business impact

Rank issues based on
business

Rank issues based on
business

MITIGATION

Transform security
into a catalyst for
innovation

Mitigation

USING

Contextual awareness

Risk insights

Predictive analytics

Integration and automation

Actively preempt threats

Stop breaches before they happen

Reduce risk to accelerate business growth

Optimize resources and security investments

Trend Vision One™

AI-Powered Enterprise Cybersecurity Platform

AI Innovation

Securing AI Initiatives

Balances your needs for **AI** innovation with securing those **AI** initiatives

Trend Vision One AI Solution Strategy

AI for Security

enhance your cybersecurity efforts and transform security operations with AI

Security for AI

secure your AI journey and defend against AI-related threats and attacks

AI Ecosystem

Threat and Attack Intelligence

Responsible AI

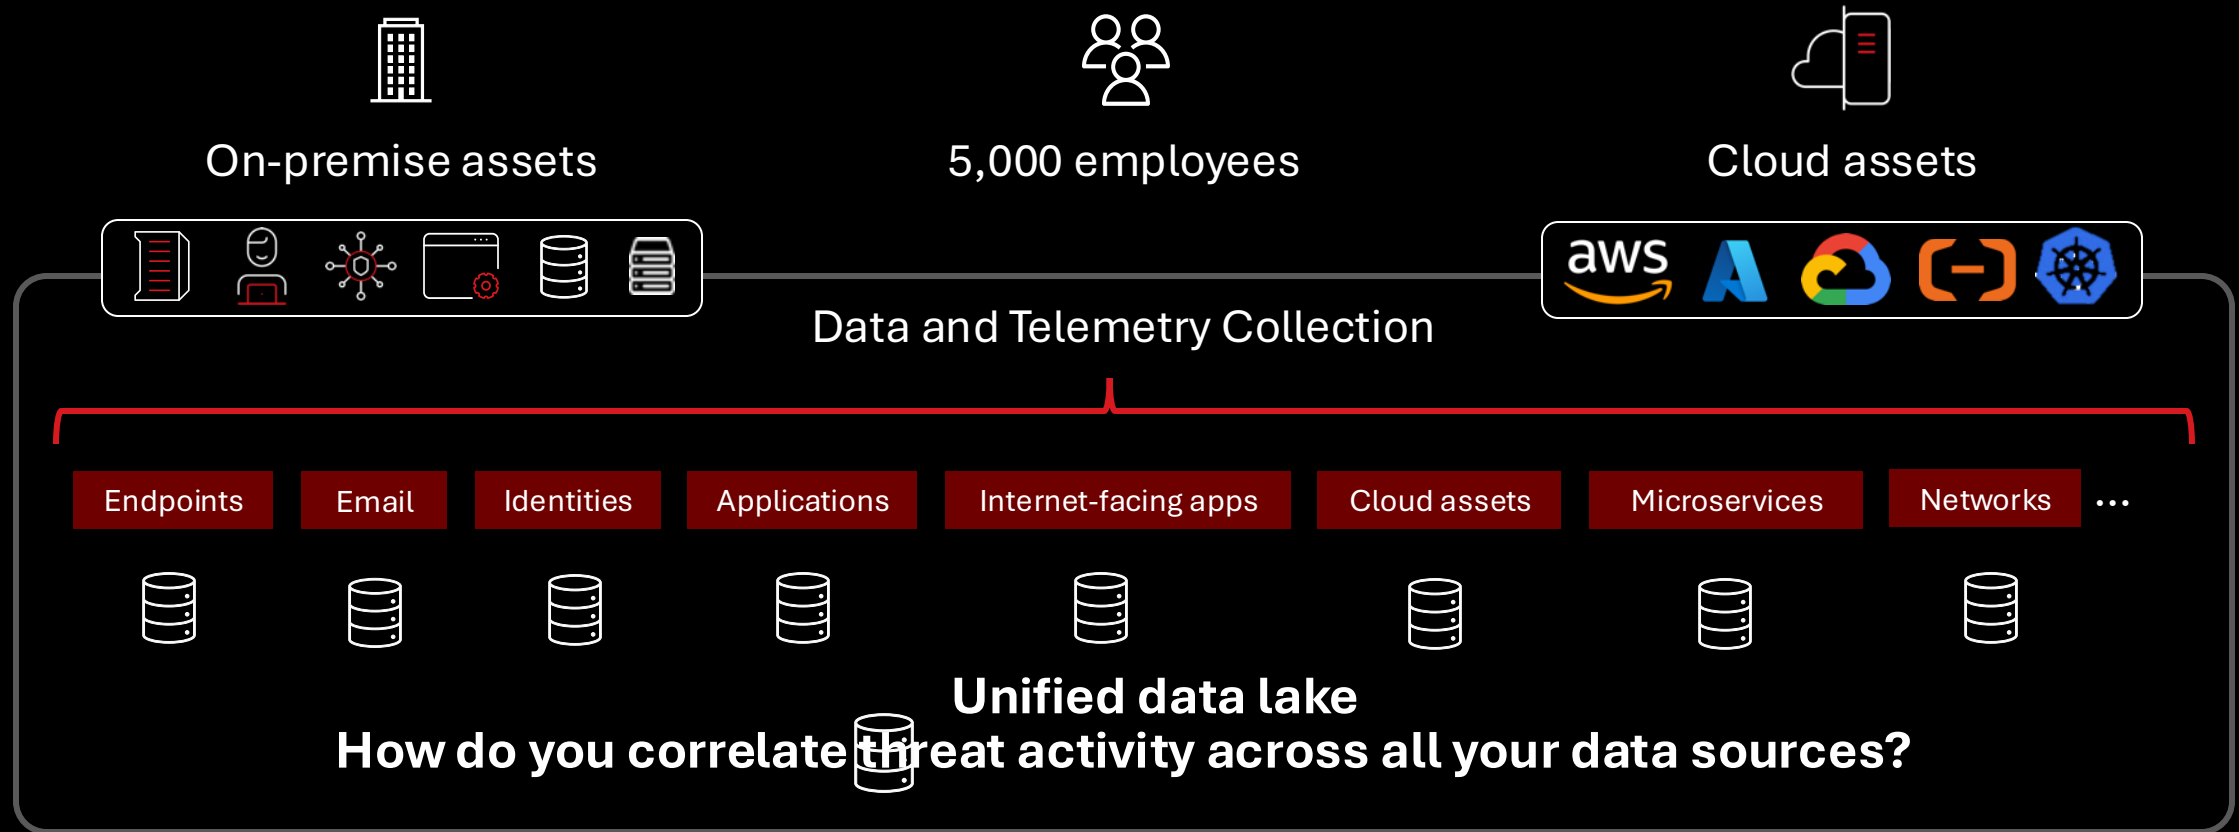

AI-Powered Enterprise Cybersecurity
Platform

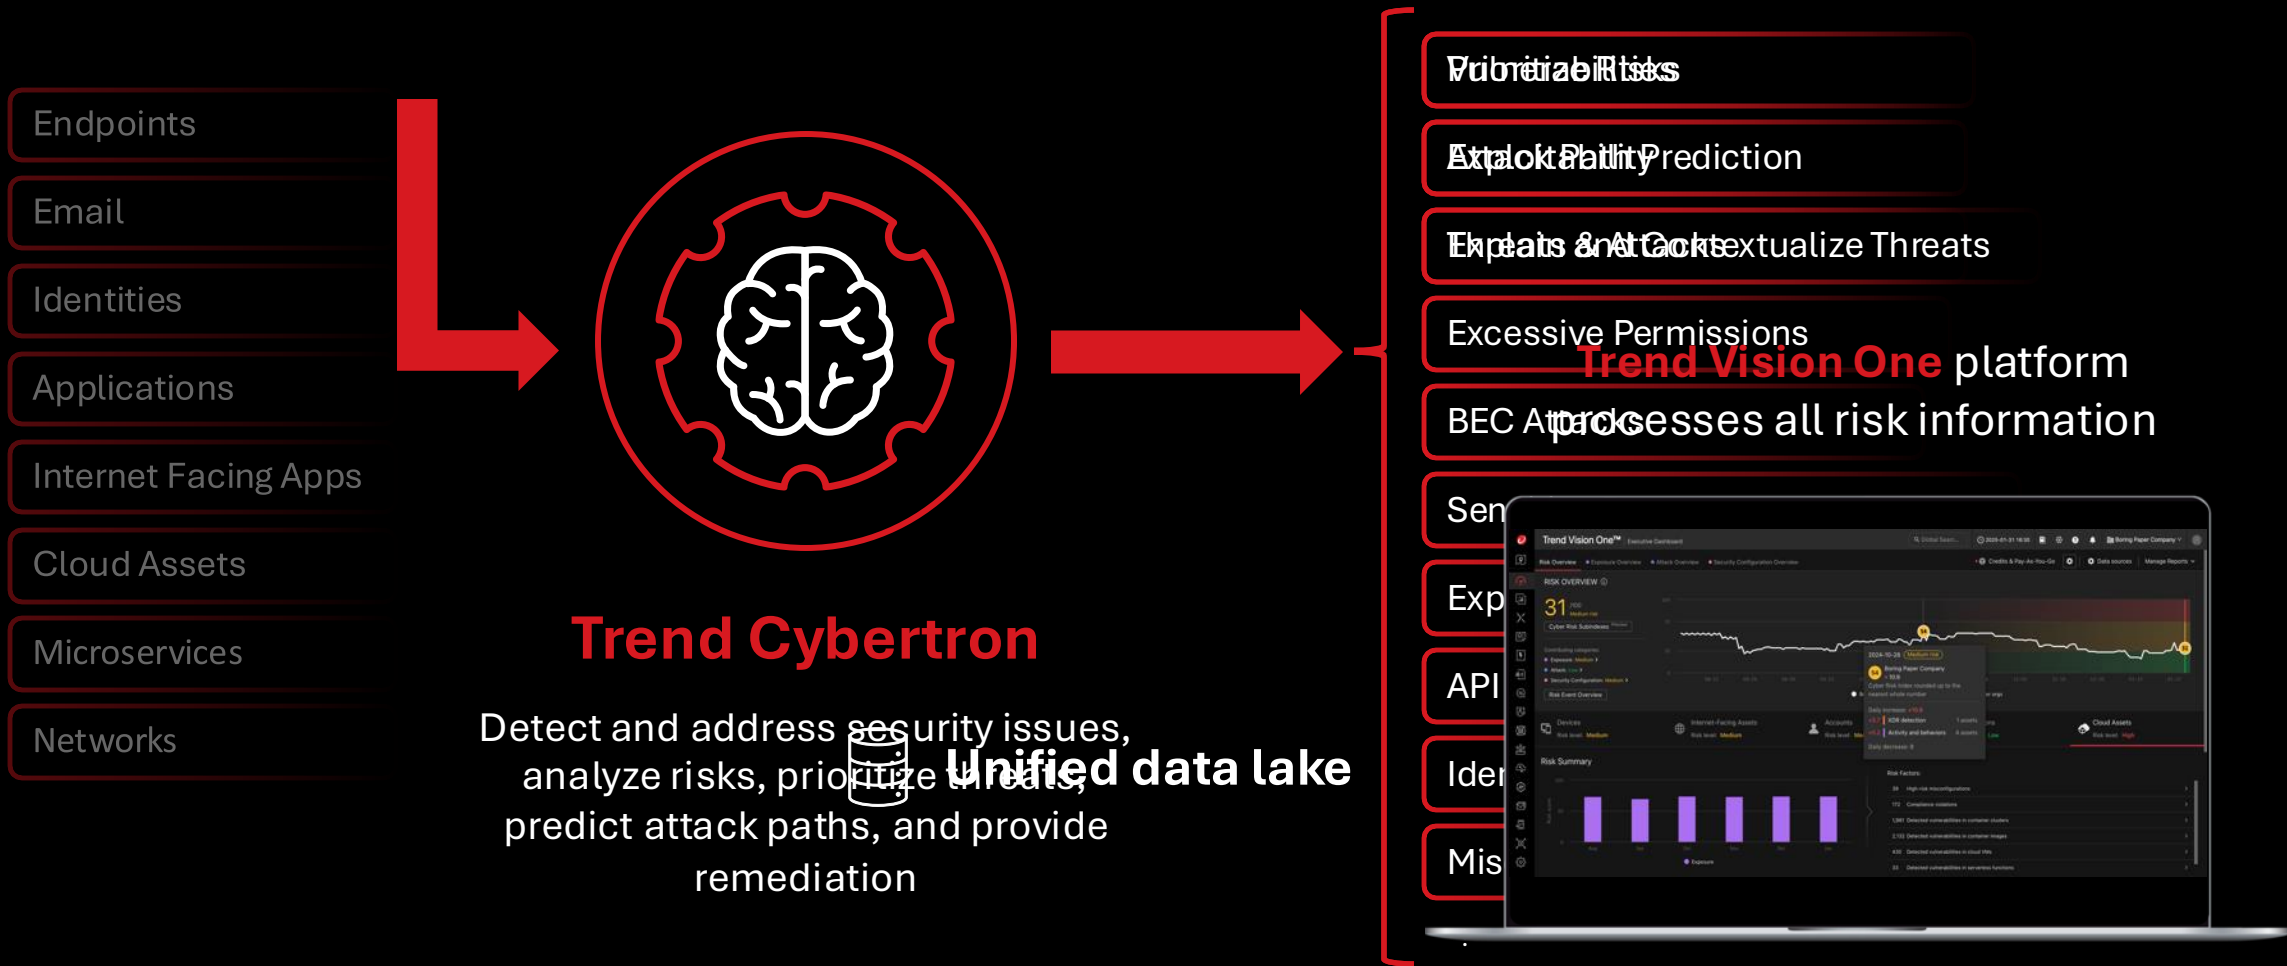

Trend Cybertron

The industry's first **proactive cybersecurity AI**. Within Trend Vision One, Trend Cybertron is a collection of LLM models, datasets, and AI an agent featuring a fine-tuned cybersecurity LLM.

Attack Paths Analysis AI

Attack Paths Remediation Tips

Risk level: All (86)

Publicly exposed compute instance with attached privileged role
Choke point: AssetName
> Remediation: Update OS software

Publicly exposed compute instance with attached privileged role
Choke point: AssetName
> Remediation: Update OS software

Publicly exposed compute instance with attached privileged role
Choke point: AssetName
Remediation:
• If the internet exposure is not expected, disconnect the device from the internet to prevent unauthorized access from outside.
• Patch or fix the vulnerabilities on the device.

Publicly exposed compute instance with attached privileged role
Choke point: AssetName
> Remediation: Update OS software

Publicly exposed compute instance with attached privileged role
Choke point: AssetName
> Remediation: Update OS software

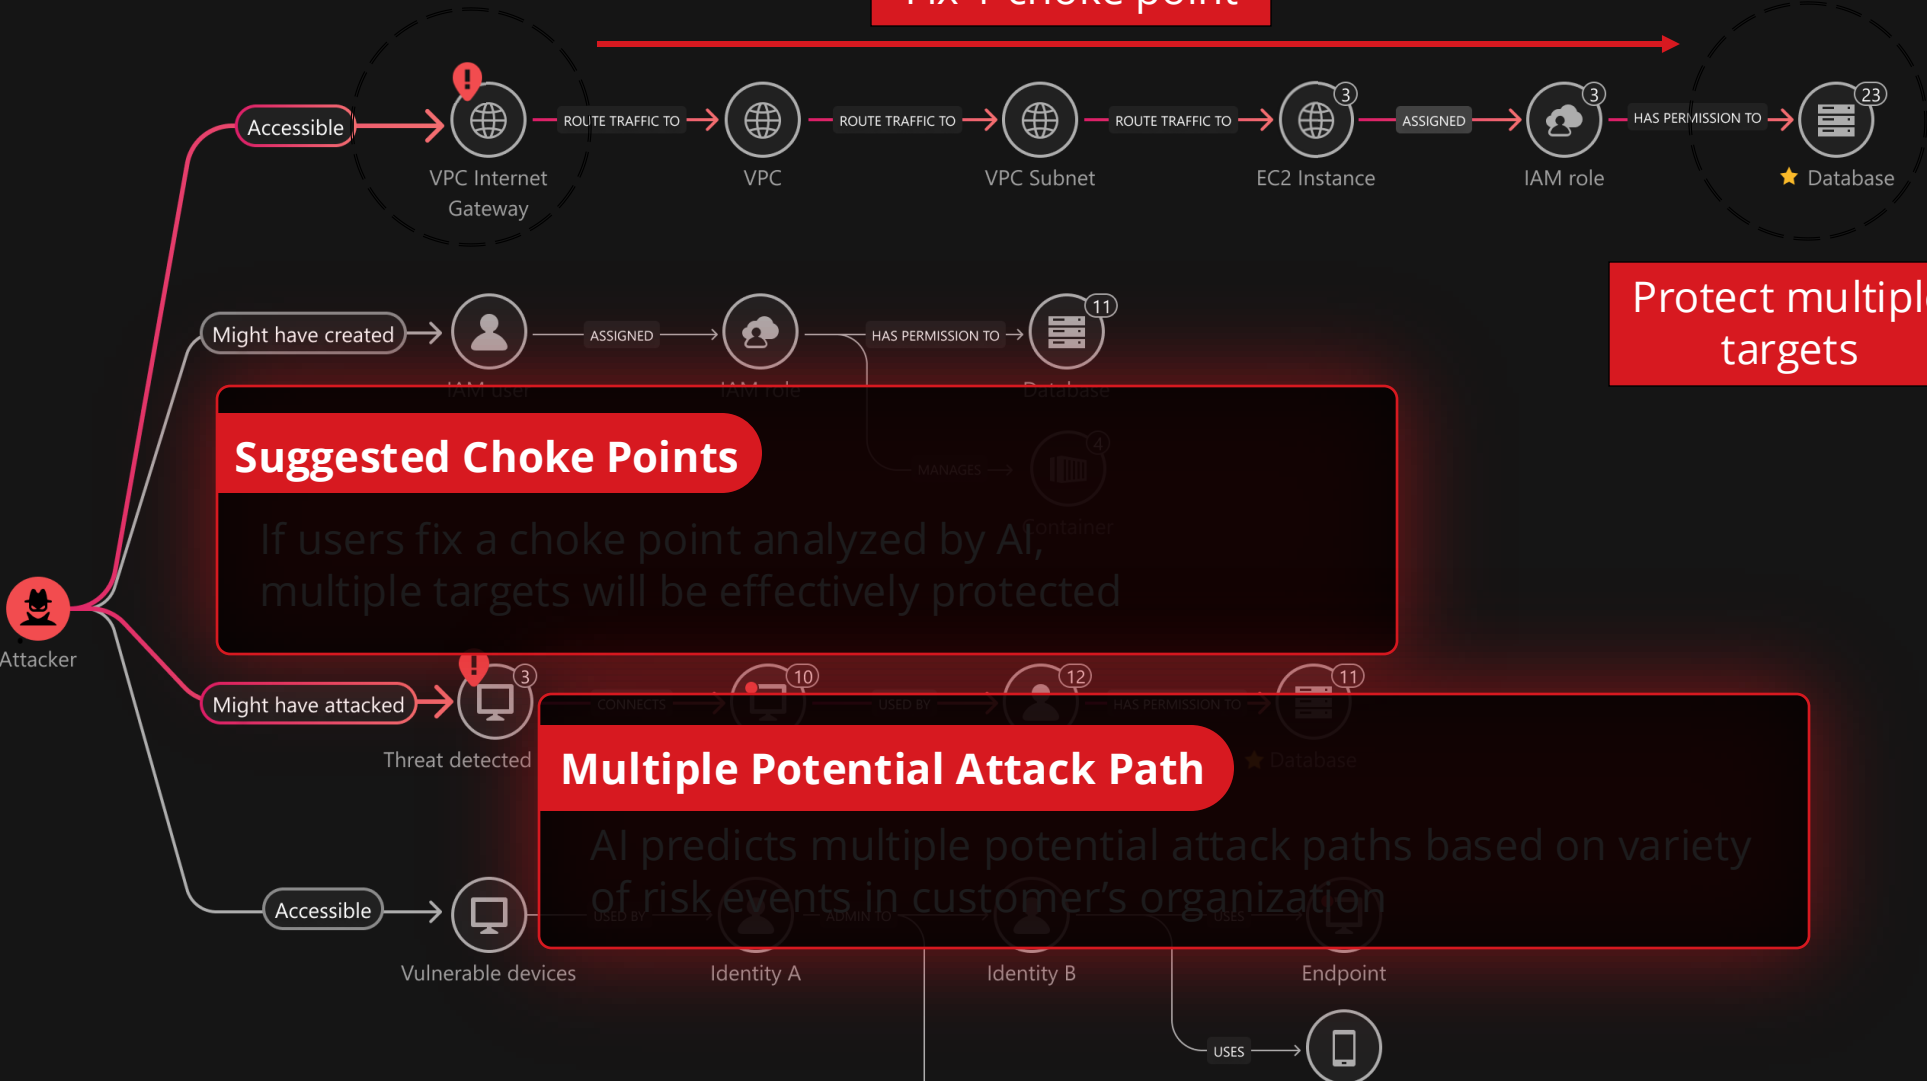

Multiple potential attack paths exist
